

Start a BotsIQ Team!

Junior and senior high teachers of math, science, or technology are invited to participate in the next Jumpstart Training Workshop.

The cost of the workshop is \$700 per teacher and includes the following:

- The basic components required for you and your students to build your first competition-ready robot—including a battery pack and charger.
- All the basic information and contacts you need to build the rest of your bot, learn the rules, find out about opportunities for company mentorship, etc.
- Continental breakfast and lunch
- Parking

Summer workshop is July 30-31. Reserve your spot now!

“Stealth learning at its best! Real world applications with hands-on learning and traditional theory combined . . . it’s so much fun you don’t even realize how much you’re learning.” – Nola Garcia, Founder, BotsIQ

For more information, contact Maureen Carruthers at the Dayton Tooling and Manufacturing Association (937) 512-3862 or mcarruthers@dtma.org.

BotsIQ is made possible in part through grants from The Engineering & Science Foundation, the Engineers Club of Dayton & the National Tooling and Machining Foundation
